This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

COMPOUND INTEREST TABLES

BY

THOMAS GEORGE RANCE

TABLES

OF

COMPOUND INTEREST,

FOR

EVERY $\frac{1}{4}$ PER CENT.

FROM $\frac{1}{4}$ TO 10 PER CENT.,

AND FOR

EVERY YEAR

FROM 1 TO 100 YEARS.

BY

THOMAS GEORGE RANCE,

OF THE SUN FIRE OFFICE.

LONDON:
PRINTED BY HARRISON & SON, ST. MARTIN'S LANE.
1852.

181. h. 4.

THE FOLLOWING TABLES

ARE, WITH PERMISSION, RESPECTFULLY DEDICATED

TO THE

CHAIRMAN, DEPUTY CHAIRMAN, AND DIRECTORS,

OF THE

SUN FIRE OFFICE,

BY

THEIR OBLIGED AND FAITHFUL SERVANT,

THE AUTHOR.

PREFACE.

THE accompanying Tables are offered to the notice of the public as the most complete tables of compound interest which have hitherto been published.

They include rates of interest for every quarter per cent., commencing with $\frac{1}{4}$ per cent. and extending to 10 per cent., and for every year to 100 years, the interest payable *annually*.

They also show the results for *half-yearly* interest for every $\frac{1}{2}$ per cent. per annum, commencing at $\frac{1}{2}$ per cent. and extending to 20 per cent., and for every half-year to 50 years.

They further show the results for rates of interest payable *quarterly* for every variation of 1 per cent. per annum, from 1 per cent. to 40 per cent., and from 1 to 25 years.

Accuracy in such a work as the present is of course essential. To ensure it in the original computations, the calculations were made three times separately, and the results compared; and to secure it in the printing, the type was set up from one of the manuscript computations, and the printed pages compared with the other two. Further, after the print had been carefully examined, the work was stereotyped, and the stereotype pages were then read twice with the original manuscripts. The copies furnished to the public are from the examined stereotyped plates.

The tables have been so arranged as to need little or no explanation beyond the simple inspection of them. Each opening of the book exhibits complete the tables for any given rate of

interest. The *rate* is shown in large figures at the top of each page.

The first column contains the number of years.

The second shows the present value of one pound discounted for any number of years.

The third shows the present value of one pound per annum payable for any number of years.

The fourth shows the amount to which one pound would encrease at the end of any number of years.

The fifth shows the amount to which one pound per annum would encrease at the end of any number of years.

The foregoing shows the results when interest is payable *annually*.

If interest is payable *half-yearly*, then take half the annual rate, and double the period; for instance:—If it be desired to find the present value of one pound to be received at the end of 15 years, interest at the rate of 4 per cent. per annum, but payable half-yearly, turn to the rate 2 per cent. and to the term 30 years, and the value is at once found to be .5520709. If it be desired to find the accumulation of one pound at the end of 20 years, interest at the rate of 5 per cent. per annum, but payable half-yearly, turn to the rate 2½ per cent., and to the term 40 years, the sum there shown will be the answer required, 2.6850641.

When the question is, the present value of one pound *per annum* for a specified number of years, or the amount of one pound *per annum* at the end of a given term, proceed as before, but the amount given in the table must be divided by two. For instance:—What is the present value of one pound per annum for 16 years, interest at the rate of 4½ per cent. per annum, payable half-yearly? Turn to the rate 2¼ per cent., and to the period 32 years, and the value there found is 22.6376736, which, divided by two, is equal to 11.3188368. If the amount of one pound per annum at the end of 12 years be sought, interest 6 per cent., payable half-yearly, then turn to the rate 3 per cent., and to the period 24 years, the value there found is 34.4264698, the half of which, 17.2132349, is the result required.

The same principle operates when interest is payable *quarterly*. For instance:—What is the present value of one pound to be received at the end of 20 years, interest payable quarterly, at the

rate of 11 per cent. per annum? Turn to the rate $2\frac{3}{4}$ per cent., and to the period 80 years, and the answer is seen by inspection to be .1141441. Again, required the amount to which one pound will encrease at the end of 8 years, interest 6 per cent. per annum, payable quarterly. Turn to the rate of interest $1\frac{1}{2}$ per cent., and to the period 32 years, and the answer is obtained, viz., 1.6103246.

To find the present value of one pound *per annum*, for 20 years, interest at the rate of 10 per cent. per annum, payable quarterly; turn to the rate $2\frac{1}{2}$ per cent., and to the period 80 years, and the value there found is 34.4518172. This sum, divided by 4, will be the answer required, viz., 8.6129543. Lastly, if the amount of one pound *per annum*, at the end of 14 years, be required, interest 7 per cent. per annum, payable quarterly, turn to the rate $1\frac{3}{4}$ per cent., and to the term 56 years; the value there given is 93.8266902, which, divided by 4, is the result required, viz., 23.4566726.

Deferred Annuities.

The column headed "The present value of £1 per annum," shows the value of an immediate annuity for periods extending from 1 year to 100 years. If, however, it be desired to ascertain the present value of a deferred annuity, proceed as follows:—

For a perpetual annuity:—Deduct from the present value of the perpetuity, as shown at the bottom of the right hand page, the present value of an annuity for the period deferred, the remainder will show the value required. For instance: What is the present value of an annuity of £1 in perpetuity to commence in 20 years, interest at the rate of 4 per cent.

The value of the immediate perpetuity is -	25.0000000
The value of an annuity for 20 years is -	13.5903260
The difference is the value sought - -	11.4096740

If the deferred annuity, instead of being perpetual, is to continue *for a limited term only*, find the present value of one pound per annum for the whole period, that is, from the present time to the time when the annuity shall cease, and deduct therefrom the present value of one pound per annum for the period during which the annuity is deferred.

EXAMPLE. What is the value of an annuity of £1 for 30 years, but not to commence until the expiration of 25 years. Interest 5 per cent?

Then the whole period from the present time to the time when the annuity shall cease is 30 + 25 years = 55 years.

The present value of an annuity for 55 years is	18.6334711
Deduct the present value of an annuity for 25 years - - - - - - -	14.0939441
The difference is the present value of an annuity for 30 years deferred 25 years -	4.5395270

To aid those who may not be accustomed to convert parts of a pound into decimal fractions, tables have been added at the end of the work, showing the decimal fraction for every shilling, penny, and farthing in the pound, and showing also the nearest farthing, penny, or shilling equivalent to any decimal fraction.

Perpetuity . . 10.0000000

THE FOLLOWING TABLES CONTAIN—

I.

THE DECIMAL PARTS OF A POUND CORRESPONDING TO ANY NUMBER OF SHILLINGS, PENCE, AND FARTHINGS.

II.

THE NEAREST VALUE IN SHILLINGS AND PENCE OF ANY GIVEN DECIMAL.

III.

THE NEAREST VALUE IN SHILLINGS, PENCE, AND FARTHINGS, OF ANY GIVEN DECIMAL.

Table I.—*Shewing the decimal parts of a pound corresponding to any number of shillings, pence, and farthings.*
